

Nguyen Minh Quan (Garold)

Ho Chi Minh City • Vietnam • garoldnguyen@gmail.com • (+ 84) 905 47 2003 • [Portfolio](#)

Certifications

- [ISC2 Systems Security Certified Practitioner \(ISC2 SSCP\)](#) April 2026
- [ISC2 Certified in Cybersecurity \(ISC2 CC\)](#) June 2025
- CompTIA Security+ (SY0-701) July 2024
- ISC2 Certified Information Systems Security Professional (ISC2 CISSP)
 - In progress (expected December 2026)

Skills

- **Security Frameworks & Governance:** ISO 27001, NIST CSF, NIST RMF, PCI-DSS, APRA CPS 230/234, STRIDE
- **Security Domains:** Enterprise Security Architecture, Application Security, Shift-Left CI/CD Pipelines, IAM, Multi-Cloud Security, Security SDLC, OWASP
- **AI Security:** Applied Machine Learning for Security (SageMaker & Bedrock), Security Automation (Python, PowerShell), Data Analytics (SQL, Neo4J).

Working Experience

Security Advisory & Architecture – Security Associate

June 2024 – Present

National Australia Bank Innovation Centre - Vietnam

- Lead end-to-end security architecture and risk governance for *Business Transaction Banking* domain, acting as the primary security architect for all asset lifecycle changes, tech modernization initiatives/projects.
 - Review and assess proposed solutions to identify security risks, vulnerabilities, and control gaps across applications, infrastructure, cloud, and integration platforms.
 - Collaborate with senior stakeholders and project teams to influence secure design decisions and improve security posture.
 - Advise stakeholders on security domains including SIEM, vulnerability management, secure communications, data protection, and security monitoring.
- Perform security due diligence for infrastructure leveraging the STRIDE framework. Ensure compliance across frameworks, and regulatory requirements under NAB Policy policies:
 - Conduct SaaS cloud service risk assessments for onboarding/renewals contracts with vendors.
 - Assess security to identify and retire obsolete assets, directly improving the division's Tech Modernization Score and eliminating legacy vulnerability vectors.
 - Design conceptual and logical security architectures aligned with enterprise security standards, governance frameworks, and risk appetite.
- Train and mentor for Security Advisory interns, guiding them through enterprise security frameworks, threat modeling, and day-to-day risk assessments.

Infrastructure Technical Support Engineer

Nov 2023 – May 2024

ItechWX Limited Company - Vietnam

- Guided global customers through the deployment, configuration, and fault remediation of Microsoft System Center Suite (Orchestrator, Configuration Manager, Operations Manager) and Azure VM environments, utilizing PowerShell scripts to accelerate incident resolution.

- Diagnosed and restored interrupted data management pipelines, optimizing clients' SQL Server and SSRS configurations to ensure continuous automated reporting and ETL operations.
- Administered on-premises Active Directory environments (Windows/Linux) and managed Azure cloud services (VMs, SCOM) through PowerShell automation scripts.
- Acted as a primary technical point for critical infrastructure incidents for Fortune 500-level customers (\$100, \$300). Achieved a > 90% SLA resolution rate and maintained a perfect 5/5 customer satisfaction score from the Vietnam Microsoft System Center team.

Professional Experience

AI Consultant, Researcher (project-based)

Feb 2024 – Sep 2024

De Heus Myanmar

- Contributed to 7-months AI adoption roadmap for De Heus. Designed 6-phase implementation strategy integrating machine learning into broiler farming operations
- Developed predictive model achieving 99.57% accuracy – Built and compared many algorithms to forecast broiler weight using environmental and feed data.
- Created interactive web dashboard using Streamlit application with real-time predictions and data visualization for agricultural decision-making.
- **Result:** Delivered a [four-year detail roadmap](#) for De Heus Myanmar with suggested of 15% reduction in broiler deaths through improved environmental monitoring and control systems.

Education

Royal Melbourne Institute of Technology Vietnam

Bachelor of Information Technology – Artificial Intelligence

Scholar's List for Academic Excellence - Top 5% of Program

Projects & Honors

[Young Leader for Vietnam \(organized by McKinsey & Co.\)](#)

Oct 2025

[VP Bank Technology Hackathon Finale \(in collaboration with AWS\)](#)

July 2025

- **Achievement:** 98% accuracy in risk classification and 87.3% transaction pattern detection with sub-300ms response times, reducing manual review time by 90% and delivering projected annual savings of \$28K-48K per compliance officer.
- **Technologies:** AWS (Bedrock, SageMaker, RDS, EventBridge, Cognito, WAF), Python, Docker, Neo4J, LightGBM, XGBoost, MySQL, Vietnamese NLP

Publications

- **Ephemeral Polymorphic Defense: A Preliminary Study of Small Language Model Agents for Cloud Security Automation**
 - *Authors:* Thach Ngo, **Quan Nguyen (Co-first author)**, Dat Le, et al.
 - **Status:** Under review for [ICONIP 2026 Conference](#)
 - **Research Focus:** Proposed a lightweight, stateless SLM architecture integrated within CNAPPs to automate security remediation.
 - **Technical Impact:** Built demand-driven execution mechanism using randomized persona injection and post-task memory teardown. This approach mitigated prompt injection vulnerabilities, optimizing the balance between Attack Success Rate and Task Success Rate.
